

How to care for your engraved tiles?

Ask your local contractors about all your tile placement needs; they are your best advisors based on the type of weather in your region.

Tips when installing your tiles.

- Avoid placing your tiles outside in areas where there is foot traffic.

Remember that tiles can be a slip hazard!

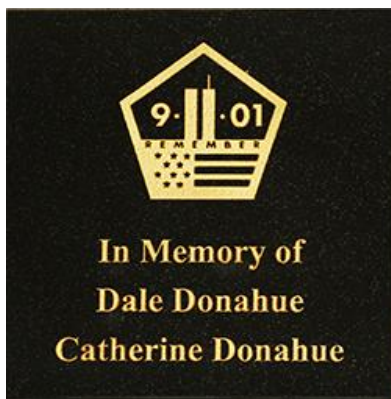

- Make sure the temperature is warm enough for installation.
- Check with your contractor on which would be the best way to attach the tiles to walls or floors.

Now that you have installed your tiles, how can you keep them looking great?

Tips to keep your tiles clean!

- Use a sponge or other non-abrasive material to clean your tiles.
- We recommend using water and soap to keep your tiles beautiful.
- Gently hose off your tiles.

What you should avoid when cleaning your tiles?

- High pressure water cleaning
- Acid based cleaners
- Do not use steel brushes to remove debris.

If you follow these easy steps we are sure that your tiles will be beautiful for years to come.
